# **DUROWEAVE** *Deluxe*™

## **ORDERING INFORMATION**

1) Duroweave Deluxe is a shrink-on, stay-on version of regular Duroweave Dampening Covers. When wet with hot water the yarn will shrink to form a tight fit around the circumference and over the end of the roller, eliminating the need for drawstrings or sewing. They are available in pre-cut lengths for ductor and form rollers for most duplicators and small sheetfed presses. Rolls are not available. Ductor and form covers are packaged and sold individually -- sets consisting of one ductor and one form cover are not available.

All Duroweave Deluxe covers are packaged in our exclusive "Slip-Mount" bags unless noted otherwise. This unique plastic container is not only the package, but a mounting tube as well.

2) To order, locate the press make and model number in the "Listing by Press Make and Model" section on pages 3 through 5. Order the cover by the product number listed under the ductor or form heading.

The two digit number in the product number after the prefix "DX" is a diameter size code. The number after

the hyphen indicates the maximum length roller which can be fitted by that particular product number. The length of material provided will be in excess of the roller length to allow for shrinkage and trimming.

3) Some presses are marketed under more than one brand or name. The primary or manufacturer's name will be listed under the "Press Make" heading while any secondary brands will be in parentheses under the "Also Fits Press Models" heading. A secondary brand cross reference chart is provided below as well.

4) Duroweave Deluxe is carefully sized to fit the roller dimensions of the original press manufacturer. Depending on the serial number, however, some presses may be equipped with different length and/or diameter rollers which may result in an imperfect cover fit. If in doubt, kindly provide the roller dimensions when ordering (diameter or circumference and length) to ensure the proper product number selection and fit.

### ***Also Available from Novatech...***

**DUROWEAVE:** The same material as Duroweave Deluxe, but with drawstrings sewn on both ends. Available in cut pieces for all duplicators and most small sheetfed and web presses.

**NEW MOL:** The world renowned premium sheared surface cover noted for its dense knit construction and durable, absorbant pile. Available in 5, 10, and 20 yard rolls and cut lengths with drawstrings for selected duplicators and presses.

***Remember...***

Duroweave Deluxe dampening covers can be made for just about any duplicator or sheetfed press. Just provide us with the diameter and length and we will select the proper stock size or make a new product size. Call or write for information and prices.

**Special Instructions for  
Omni Adast Model 715, 725, 745  
Ductor Rollers**

Over the years this particular press model has been manufactured with a variety of ductor roller sizes which complicates the proper selection of dampening covers. Depending on the age or serial number of the press, any one of the following sizes may apply. The manufacturer states, however, that all models manufactured after 1990 use the 2" x 27 5/8" roller. There are no other guidelines that we can offer you. Please query your customer carefully regarding the diameter or circumference and length before placing an order.

<b>DUCTOR ROLLER DIA.</b>	<b>ROLLER LENGTH</b>	<b>USE PRODUCT NUMBER</b>
1 1/2" (40mm)	26 3/4" (680mm)	DX 40-28 <b>\$26.20</b>
1 3/4" (46mm)	26 3/4" (680mm)	DX 60-28 <b>\$26.20</b>
2" (50mm)	27 5/8" (703mm)	DX 70-28 <b>\$26.20</b>
